HORMONES I NEUROTRANSMISSORS

Dosificar oxitocina, adrenalina, cortisol; glutamat/gaba, dopamina, serotonina, endorfines.

PENFIELD MOOD ORGAN A “Do Androids Dream of Electric Sheep?” (1968) P.K. Dick concep un dispositiu, el Penfield Mood Organ, que envia ones que modifiquen el nostre estat d'ànim i es pot programar per endavant. El nom estaria basat en el neuròleg Wilder Penfield. *"At the Penfield mood organ, Iran Deckard sat with her right index finger touching the numbered dial. But she did not dial; she felt too listless and ill to want anything: a burden which closed off the future and any possibilities which it might once have contained. If Rick were here, she thought, "he'd get me to dial 3 and that way I'd find myself wanting to dial something important, ebullient joy or if not that then possibly an 888, the desire to watch TV no matter what's on it.*
